Altitude Constraint Coding

Currently, the Lido FMS data contains Minimum Enroute Altitudes (MEA) coded as altitude constraints. As of cycle 1204, effective 05-APR-2012, Lufthansa Systems will remove such altitude constraints, and only include state published altitude constraints.

Additionally, "expect" altitudes (for example: "expect to cross at …..") will be removed as coded altitude constraints.

An example of a MEA and an Expect Altitude that will be removed as coded altitude constraints:
